Safest Practice

Birth - 12 months

Always ride in a rear-facing car seat, in the back seat.

**American Academy of Pediatrics (AAP) recommends a rear-facing car seat until 2 years of age or until they reach the highest height or weight allowed by the car seat manufacturer.*

*Age 1 - 3 years

Rear-facing in back seat, as long as possible, within the height or weight limit allowed by car seat manufacturer. Then front-facing car seat in back seat.

Age 4 - 7 years

Front-facing car seat used within the height or weight limit allowed by the car seat manufacturer. Then a booster seat using lap and shoulder seat belt in the back seat.

Age 8 - 12 years

Booster seat until seat belt fits properly with lap belt snug across the upper thighs, not the stomach and shoulder belt snug across the chest, not across the neck/face. Keep children in the back seat until age 13.

Originally developed by GA Dept. of Public Health

Description of Restraint Types

A **REAR-FACING CAR SEAT** is the best seat for your young child to use. It has a harness and in a crash, cradles and moves with your child to reduce the stress to the child's fragile neck and spinal cord.

A **FRONT-FACING CAR SEAT** has a harness and tether that limits your child's forward movement during a crash.

A **BOOSTER SEAT** positions the seat belts so they fit properly over the stronger parts of your child's body.

A **SEAT BELT** should lie across the upper thighs and be snug across the shoulder and chest to restrain your child safely in a crash. It should not rest on the stomach area or across the neck.

Car Seat Recommendations

Every transition decreases protection.
Delay transition to the next step as long as possible.

- Choose a car seat based on your child's size (height and weight)
- Read your car seat instructions for use and installation information
- Read the vehicle owner's manual on how to install the car seat using the seat belt or LATCH system
- Keep your child in a harness as long as your child fits within the height and weight limits
- Keep your child in the back seat until age 13 for best protection
- Check the expiration date and know history of your car seat
