

Point Creek Natural Area

Leave No Trace

Take Only Photos, Leave Only Footprints

About

Welcome to a special place - The Point Creek Natural Area. Point Creek Natural Area was added to the Manitowoc County Park System in June, 2002 with a conservation easement held by Glacial Lakes Conservancy. The property consists of 39 acres of woodlands, meadows, estuary, wetlands, and coastal bluffs with approximately 2,800 feet of high bluff bank and associated Lake Michigan shore. Point Creek defines the southern boundary of the property, which includes over 1,000 feet of riparian corridor. Both public and private funds were raised for its purchase, including grants from Wisconsin's Knowles-Nelson Stewardship Program and Coastal Management Fund. University of Wisconsin students and faculty from Green Bay, Manitowoc, and Sheboygan use the area for study and research projects. The park is being actively managed to become one ecological unit with the mature 45 acre northern hardwood forest on the south side of the creek, owned by the University of Wisconsin Green Bay.

PARK SEASON AND HOURS:
APRIL 1ST - OCTOBER 31ST
DAWN TO DUSK

*Park not maintained
beyond season dates.
