

MANURE STORAGE FACILITIES (CLOSURE)

What is a Manure Storage Facility?

A structure that allows farms to properly store manure until optimum spreading times

Why install a Manure Storage Facility?

Ensure that manure is properly stored to meet state standards and prevent runoff of manure to surface and groundwater

Things to Consider

- County Ordinances require manure storages to be closed if waste has not been added for 24 months
- Manure storage closure is another cost sharable practice
- Manitowoc County SWCD requires permits for manure storage facility construction and abandonment
