Personal Emergency Response Systems (PERS)

Personal Emergency Response Systems (PERS), or medical alert systems, let you call for help in the event of a fall or other emergency. The alert system is activated by pressing a button located on the device. Once the alarm is received, personnel with the emergency response center will contact the individual. If there is no response or further assistance is needed, personnel will notify the emergency contact listed. Responders may be family, neighbors, or friends residing nearby. Emergency services may be called.

Providers charge an assessment or activation fee, and a monthly service fee. Rates may vary. Please call the provider for more information.
