Dear Landowner,

The Soil & Water Conservation Department is tasked with supporting farming and protecting farmland with sensible oversight to protect soil and water resources. Manitowoc County has adopted the Livestock Facility License Ordinance – Chapter 28; to monitor and ensure expanding farms meet property setbacks, odor management, construction and waste runoff standards and allow for public input on farm expansion plans.

Livestock Facility License Ordinance – Chapter 28 information is available on our website:
<https://manitowocountywi.gov/departments/soil-and-water-conservation/local-ordinances/>

Farms applying for Livestock Facility Licenses in Manitowoc County are required to prepare and submit a 5-Year Nutrient Management Plan (NMP). As part of this plan, _____
Farm has maps identifying your land as available for the safe application of manure and waste over the next five years.

Signing this form confirms that you have been contacted and made aware your land listed will be available for the farm's planning purposes and application of animal waste over the next 5 years.

- This takes effect upon signing and may be amended by mutual consent in the future.
- This document does not constitute a land rental contract.

Please call our office to clarify any questions.
