Non-Medical Home Care Providers

Home care providers assist individuals with completing daily living activities or supportive cares in their home. Activities typically consist of companionship care, housekeeping, personal cares, medication reminders, grocery shopping, running errands, transportation to appointments, meal preparation, and more. This service is typically not covered by Medicare or other insurance. Payment options may include private pay, VA funding, long-term care insurance, or through publicly-funded programs. Contact the provider directly for more information.
